CTC•CHINA

COMPANY PROFILE

CTC•CHINA is a comprehensive enterprise integrating agriculture, industry and trade. As a global leader in the supply of plant derived raw materials, we have a professional research and development team, which is committed to the research and development, production and supply of key raw and auxiliary ingredients in the pet food and animal feed industry, as well as OEM and ODM processing services for small pet, exotic staple food and snacks. The company adheres to strict quality control standards and has passed international authoritative quality management and safety system certifications such as GMP+, GMA-SAFE, ISO22000, and HACCP. We can provide customers with high-quality and reliable sources in the industry for plant-based materials, functional materials, and clean label materials.

With 20 years of experience in the industry, CTC•CHINA has established a strong ability to integrate global resources. We have successfully integrated high-quality raw material resources from Canada, Vietnam, Cambodia, Africa, Türkiye, Russia, India, Egypt and other places, and formed a stable and high-quality global supply chain system to ensure the stability of raw material supply, while being able to respond quickly to market changes, and comprehensively meet the diversified and one-stop procurement needs of customers. The advancing "Cornell China" takes "Made in China, Cornell takes responsibility" as its mission, and is building a resource-saving and environmentally friendly enterprise with a high sense of social responsibility and safety mission; Promoting ecological civilization construction and achieving green development; Together with the world's top customers, industry renowned suppliers, and excellent Cornell staff team, we form three major interest communities, working together to lead the development of the plant-based raw material industry and directly respond to the increasingly new and diverse market challenges in our industry.

OEM / ODM All Types Of Small Pet Food

Manufacturing Expert

Provide year round premium, sustainable and safe pet food ingredients to customers worldwide.

Agency Oversea Brands

Agent brands outside China to market success in fast-growing China Market.

Plant-based Pet Food Ingredients Supplier

OEM / ODM All types of small pet food.

Global supplier of plant source raw materials

Focus on offering key raw materials and ingredients for the food industry, pet food industry and livestock feed industry

Stable output of single product

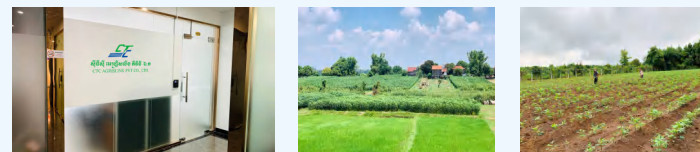

ISO22000, FDA, and GMA certificated company

Specialized and Sophisticated Enterprise in Qingdao

Assist downstream enterprises in achieving carbon emission reduction plan and animal welfare

CTC AGRISLINK CTC SOUTHEAST ASIA PROJECT

In order to meet the challenges of global supply chain and market demand, CTC•CHINA strategically laid out in Southeast Asia, and set up production bases in Ho Chi Minh City, Vietnam and Phnom Penh, Cambodia - CTC AGRISLINK PRODUCTS (Vietnam) Co., Ltd. and CTC AGRISLINK (Cambodia) Co., Ltd., aiming to optimize the supply chain system and enhance global business resilience. Southeast Asia, with its unique climate conditions (suitable for sweet potato and cassava cultivation), fertile soil, and low labor and production costs, has become the core choice for Cornell to expand production capacity and reduce operating costs.

Through the establishment of its Southeast Asian base, Cornell has achieved diversification and localization of its supply chain: on the one hand, it has dispersed market risks caused by trade frictions between China and the United States, shortened raw material procurement and product delivery cycles; On the other hand, relying on the abundant agricultural resources in Vietnam and Cambodia, we can scale up the production of cost-effective plant-based pet food raw materials, including sweet potato series (fresh sweet potato, sweet potato slices, granules, powder) and cassava series (cassava slices, starch, and environmentally friendly granules), to meet the global customers' demand for gluten free and high nutrient products.

As a leading supplier of plant-based pet food ingredients worldwide, Cornell has always adhered to the mission of "Made in China, Committed to Cornell", and is committed to providing safe and sustainable plant-based solutions for the global pet food industry through the deepening layout of Southeast Asian projects. In the future, Cornell will continue to optimize supply chain resilience, expand international markets, promote the industry towards efficiency and environmental protection through innovative technology and responsible practices, safeguard pet health, and empower partners for win-win outcomes.

Direct Supply Of Exported High-quality Feed Raw Materials

Imported superior products such as timothy grass, alfalfa grass, alfalfa grass pellets, and oat grass.

Our farm base is uniquely located on the beautiful west coast of the United States, with a longitude of 77.02 degrees west and a latitude of 38.54 degrees north. It has good sunshine, pure air and alpine ice and snow melt water. It is a paradise for grass growth.

Our factory - we have an excellent team, and our factory is adjacent to the port, we have a strict quarantine system to guarantee high quality product and service

Our shipping - we have a unique advantage: we have signed contracts with several major shipping companies to optimize the complete supply chain, with low logistics costs and high efficiency.

Plant Protein Raw Materials

Pea Protein-55%

Pea protein contains richer legume amino acids, vitamins, and dietary fiber, without lactose and cholesterol, low in calories, and has a lower bean odor.

Pea Protein-80%

Pea protein contains richer legume amino acids, vitamins, and dietary fiber, without lactose and cholesterol, low in calories, and has a lower bean odor.

Pre Gelatinized Pea Powder

Pre gelatinized pea powder is suitable for sensitive pets in pet food due to its low allergenicity. It can not only provide energy as a source of carbohydrates, but also improve the adhesion and texture of the food during processing.

Pre Gelatinized Corn Flour

Pre gelatinized corn flour is a basic pre gelatinized starch raw material widely used in pet food. It has high gelatinization degree and low cost, can provide sufficient energy for pets, and its strong adhesion is conducive to food molding. It is suitable for dry food, wet food and other categories.

Pre Gelatinized Potato Flour

Pre gelatinized potato flour is highly favored in pet food due to its high starch purity, delicate taste, low allergenicity, and good water holding capacity, especially for pets who are allergic to grains.

Pre Gelatinized Rice Noodles

Pre gelatinized big Rice noodles has the prominent advantages of low sensitization and easy digestion. It is mild in nature and non irritating. It is an ideal energy source for young pets, old pets and gastrointestinal sensitive pets in pet food, and helps to improve the processing performance and texture of food.

Functional raw Materials

Pomegranate Peel

Pomegranate peel, as an auxiliary ingredient in pet food, is rich in antioxidants, dietary fiber, and some minerals.

Pomegranate Seeds

Pomegranate seeds, after appropriate processing, are added to pet food and are rich in antioxidants and dietary fiber.

Yam Chips

Yam is rich in starch, dietary fiber, and various minerals, which can provide energy for pets, promote digestion, and are easy to absorb.

Pumpkin Seed Kernels

Pumpkin seeds are rich in high-quality protein, unsaturated fatty acids, various minerals, and vitamins, providing comprehensive nutrition.

Wax Gourd Peel

Dietary fiber is rich and low in calories, which can promote intestinal peristalsis and help pets maintain their posture.

Turmeric Slices

Curcumin and minerals containing antioxidants can help pets resist free radical damage.

Cornus Officinalis

Cornus officinalis, as a natural plant material, has the advantages of wide source, containing various natural ingredients, mild properties, and easy combination with other ingredients in pet food.

Schisandra Chinensis

Containing active ingredients and various vitamins and minerals, it can regulate pet metabolism and supplement nutrition.

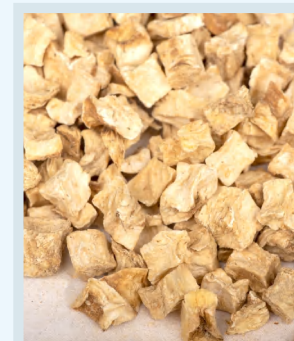

Hawthorn Ring

Containing fruit acid, dietary fiber, and vitamins, it can promote pet digestion and increase appetite, suitable for pets with weak digestion.

Psyllium Husk

High dietary fiber can promote intestinal peristalsis, regulate intestinal environment, and alleviate constipation.

Chicory Diced

Containing inulin and dietary fiber, it can promote the proliferation of beneficial bacteria in the intestine and improve the balance of the microbiota.

Circumstance

Containing amino acids, polysaccharides, and minerals, it can supplement nutrition and soothe the body of pets.

Biological Enzyme Care Cleaning Series

Pet Care And Cleaning Series

Bio-Enzyme Deodorizer

Formulated by a professional Canadian team. The compound bio-enzyme breaks down odors at the source. Broad-spectrum and highly effective antibacterial rate of 99.99%. Naturally derived, non-toxic, safe for licking, suitable for infants and mothers, and environmentally friendly with no secondary pollution.

Pet Ear Wash

Designed for cleaning pets' ear canals. The mild formula leaves a moisturizing protective layer inside the ear, helping protect the skin, reduce itching, scratching, and head shaking. Helps soothe issues caused by mites or excess earwax.

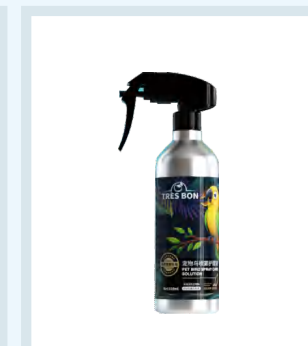

Pet Absorbent Pads

30 g super-absorbent polymer layer pre-coated with bio-enzyme deodorizer that decomposes ammonia into CO₂ and H₂O for odor removal. Can be used for pet urine, kitchen spills, or chemical liquid absorption. Suitable as cage liners, easy to carry, and tear-resistant.

Rinse-Free Glove Wipes

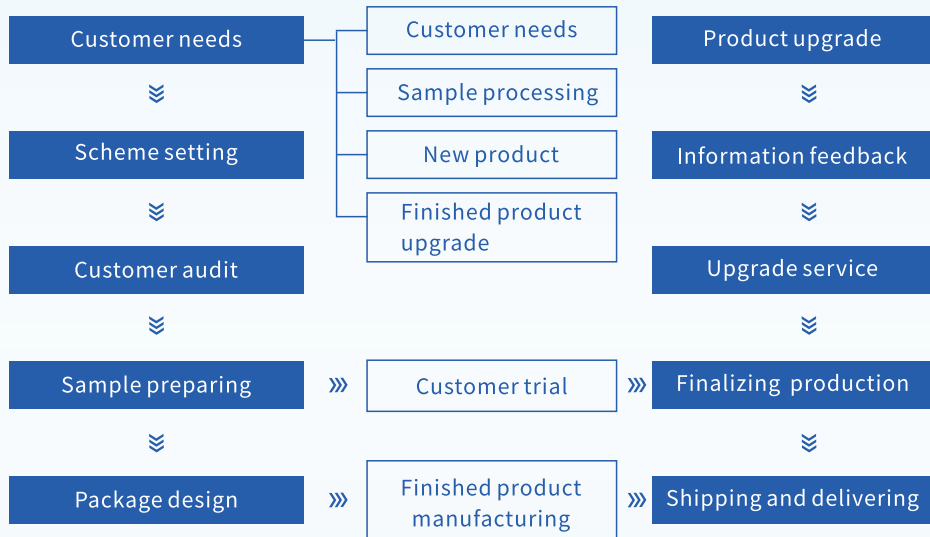

Made from skin-friendly pearl-patterned nonwoven fabric. Gentle and non-irritating formula. Suitable for cats and dogs over 14 days old. Provides 10× all-around cleaning and care, effectively removing body odor and waste smell while smoothing fur without dryness.

Pet Bird Care Solution

Developed by a professional Canadian team. Naturally derived, non-toxic, and safe. Compound bio-enzyme provides gentle, odorless antibacterial action that won't affect pets' sense of smell or agility. Cleans while nourishing feathers and provides long-lasting odor removal.

Oem Process

OEM That is, a brand owner is not responsible for product design and development, but directly entrusts a processing enterprise with design and development capabilities to design, develop and produce a product according to the specifications and requirements put forward by the brand owner, commonly known as "OEM" production.

ODM That is, a product production form in which the brand owner is responsible for product design and development, and the processing enterprise accepts the entrustment of the brand manufacturer and organizes processing and production according to the brand owner's requirements, commonly known as "ODM" production.

Drop Shipping Contact us to apply to become a distributor, we can also provide product details and provide a drop shipping service.

Mammal Pet Home (shanghai) co.,ltd

Up to now, CTC China's e-commerce company Muguang Forest brand C-end products have included food and supplies for small pets such as hamsters, chinchillas, guinea pigs, rabbits, dwarf hamsters, sugar gliders, and squirrels. Muguang Forest has attracted the attention of customers with its high-quality products and services. The company will continue to improve its comprehensive capabilities, continue to strengthen product research and development, and bring better experience to agents and customers.
